JAPAN NOT ORDERED TO WITHDRAW HER TROOPS

Washington Officials Deny Report That U. S. Demanded Guarantee of Removal.

Osaka, Japan, Friday, March 8 .-According to a dispatch to the Mainichi, of this city, from Washington, the United States is demanding a guarantee for the withdrawal of Japanese troops from Siberia immediately after the Russian crists is over.

Washington, March 11 .- It was authoritatively stated here today by officfals in close touch with the situation that no such demand as referred to in the foregoing dispatch has been made on Japan by the United States and that such a demand would be considered as impugning Japan's good faith, which the United States already has recog-

It also was stated that if Japanese troops go to Siberia the question of their withdrawal is expected to go before the peace conference.

5,000 COTTON—03w-k Fall River, Mass. March 11.—Five thousand cotton mill operatives in this city were idle today, according to figures compiled at noon by the police, be cause of a strike of 324 union firemen whose demands for shorter hours and closed shop were rejected last week by the manufacturers' association. Four of the seven mills of the American Printing company and the plants of the American Printing company and the American Thread company were closed, although 100 other factories operated with the aid of volunteer fire

SLIGHT DECLINE SEVERAL POINTS

New York, March 11.—The cotton market showed renewed nervousness early today, with fluctuations irregular. Liverpool did not fully meet the local decline of Saturday and the opening was steady at an advance of 2 to 13 points, but reactionary sentiment was encouraged by expectations of small domestic consumption figures for February and the market eased off after the call under liquidation. May sold off from 31.45 to 31.35c, and October from 29.80 to 29.63c, or about 3 to 5 points net lower, but there was Liverpool and New Orleans buying, which steadied the market up several points before the end of the first hour.

The market was quiet but steady later in the morning. Reports that prosperity had practically demoralized southern labor, and that it was not so much the scarcity of labor as difficulty in getting work done, that would operate against the coming crop, seemed to be a factor on the raily, which carried active months 22 to 27 points not higher. May sold up to 31.65c and October to 29.90c on covering and a moderate demand from the trade. Chicago, March 11.—Liberal receipts today eased the corn market. Fine weather here tended also to give the bears an advantage. Opening prices, which stood unchanged with May \$1.27%, were followed by a slight downturn and then by something of a rally.

Oats showed relative firmness. After opening %c off to a like advance, with May 89% to 89%, the market steadled at the top of the initial range.

Lower quotations on hogs weakened provisions. Trade was very dull.

Futures closed steady at the same as Saturday's finish to %c lower, with March \$1.28 and May \$1.27%.

New York, March 11.—Dry weather in the western belt caused buying of cotton here today, which put the market 14 to 20 points over Saturday's close in the first half-hour. Dry goods reports were considered favorable and trade buying was felt to some extent.

The demand increased and was met by small offerings. In the trading up to noon the net advance was widened to 28 to 31 points.

While the market was quiet in the afternoon, values were well maintained. At 1 o'clock the trading months were 27 to 30 points up, net. CHICAGO CASH.
